Impact 8 Led

Spannung: 10 – 40 Volt

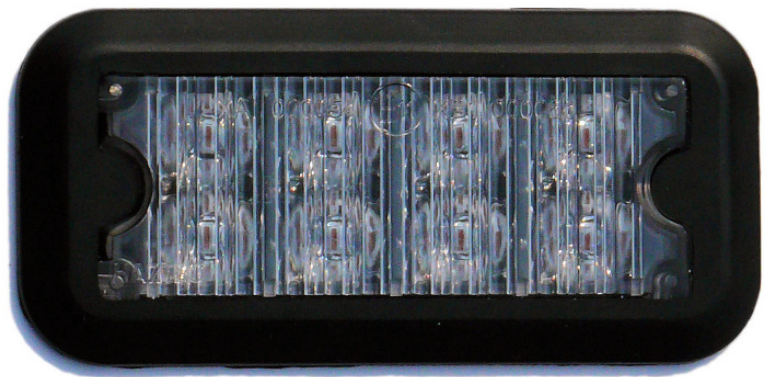

16 Blitzmuster

Grösse (mm): L100 x B45 x T30

Einbau- & Aufbaumontage

ECE65 Zulassung (blau / gelb)

Schutzart: IP68

Impact 1048 LED modules

Overview

Impact 1048 LED modules are compact and easy to install, they can either be supplied as single or dual colour versions. Latest LED technology, coupled with a highly effective optical lens design provides an impressive wide angle light output along with a working life in excess of 50,000 hours. Standard Lenses are clear, however coloured lenses can be fitted on request.

Numerous different fixing arrangements are available to order separately including dual module mounting brackets that allow modules to be stacked either horizontally or vertically, a windscreen mount option is also available.

16 different user selectable flash patterns are incorporated as standard.

Dimensions (mm): L100 x H45 x D30

Materials: Heavy duty base, lenses are moulded in strong UV stabilised polycarbonate.

Operating voltage: 10 - 40V DC
